\* UKVI IELTS alternatives: we can accept other tests as proof of English language. Learn more at: [kaplanpathways.com/uk/ielts/](https://kaplanpathways.com/uk/ielts/)

**Academic entry requirements:** for all course options above, you need to have completed high school at the required level. For requirements specific to your country, select your preferred degree and pathway course from our online Degree Finder: [kaplanpathways.com/kicl/ug-degrees](https://kaplanpathways.com/kicl/ug-degrees)

**Your course length:** this is influenced by your English language score that you submit as part of the admissions process. Soon after your course starts, we'll check your English and academic level again to make sure you're on the most suitable study plan, with modules that best fit your skills and goals.

# International Year One in Business

### All students will take the following modules:

- › English for Academic Purposes
- › Financial Accounting
- › Introduction to Marketing Principles and Consumer Behaviour
- › Management Accounting and Financial Management
- › Organisational Behaviour
- › Quantitative Methods and Information Systems for Business
- › The Business Environment

**Personal development activities:** during your course, you'll also have activities to build practical, digital and employability skills.

**Learn more about modules:** you'll find module summaries later in this booklet.

### Do you want to add an internship to your course?

You can take an integrated online internship as your final term, and gain additional career skills and experience before you start your degree.

**Learn more:** see the next page for more details.

**Extra support:** for courses of over 2 terms, you will take additional modules from a selection of Enhancement and Extended English and Skills options (depending mainly on your IELTS score) before the modules to the left.

**Students with at least UKVI IELTS 5.5:** you can study a 2.5 or 3-term course that typically includes Enhancement modules to maximise your university preparation:

- › Critical Reading, Writing and Reasoning for Higher Education
- › Independent and Collaborative Study

### Plus up to 2 of these modules:

- › Digital Applications
- › Preparatory Mathematics
- › UK Society and Culture

**Students with less than UKVI IELTS 5.5:** you will typically study Extended English and Skills modules to improve your English language level and academic skills.

**Students with UKVI IELTS 4.5 or 5.0 will typically take:**

- › English for Academic Study 3
- › Independent and Collaborative Study
- › Reading and Writing 3
- › Speaking and Listening 3

**Students with UKVI IELTS 4.0 will typically take:**

- › English for Academic Study 2 + English for Academic Study 3
- › Independent and Collaborative Study
- › Reading and Writing 2 + Reading and Writing 3
- › Speaking and Listening 2 + Speaking and Listening 3
- › Study Skills Preparation

**Learn more about modules:** you'll find summaries of course modules, personal development activities and the internship later in this booklet.

**Extra support:** for courses of over 3 terms, you will also take **Extended English and Skills modules** before the modules to the left.

Students with UKVI IELTS 4.5 or 5.0 will typically take:

- > English for Academic Study 3
- > Independent and Collaborative Study
- > Reading and Writing 3
- > Speaking and Listening 3

Students with UKVI IELTS 4.0 will typically take:

- > English for Academic Study 2 + English for Academic Study 3
- > Independent and Collaborative Study
- > Reading and Writing 2 + Reading and Writing 3
- > Speaking and Listening 2 + Speaking and Listening 3
- > Study Skills Preparation

**Biology**

Gain an understanding of biological systems and organisms, as well as key laboratory processes.

**Business Organisations and Management**

Examine key concepts in management theory and practice, and discuss issues relating to management in modern organisations.

**Chemistry**

Gain an understanding of chemical reactions, fundamental particles and the periodic table.

**Contemporary Global Issues**

Explore the big issues facing humanity in the 21st century, and critically evaluate their causes and effects.

**Creative Practice and Portfolio**

Research the work of selected practitioners in your field, responding to and evaluating their work, in your own illustrative portfolio.

**Critical Reading, Writing and Reasoning for Higher Education**

Enhance your ability to read and understand complex ideas in English, and to compose convincing written arguments.

**Digital Applications**

Develop your digital skillset, helping you use digital tools to support academic study, including using and citing digital sources.

**Economics**

Gain an understanding of macro and micro-economics, and explore current trends and issues in the field.

**Electrical and Electronic Engineering Principles 1**

Fundamentals principles of electrical and electromagnetic signals, and electronic components and circuit design.

**English for Academic Purposes**

Develop your English to the level you need for university study, and to really get involved in academic discussions.

**English for Academic Study 2**

Improve your English grammar and vocabulary in order to communicate in an academic environment.

**English for Academic Study 3**

Expand your knowledge of English grammar and vocabulary to the level required for degree study.

**Entrepreneurship**

Familiarise yourself with varied concepts of creativity, entrepreneurship and innovation, and how to apply them in business.

**Extended Project**

Learn how to plan, carry out and report an extended project; you can choose a project topic that matches your degree and career goals, and personal interests.

**Financial Accounting**

Learn about standard accounting conventions, and the role of financial accounting within organisation.

**Historical Perspectives**

Gain an understanding of the historical context of your chosen degree area, and skills such as researching, evaluating and interpreting sources.

**Independent and Collaborative Study**

Work individually and in teams on an academic task, and practise applying your subject knowledge and study skills.

**Information Technology**

Discover the key concepts of computer science, including data representation and programming languages.

**Intermediate Digital Applications**

Develop skills in problem-solving and creative practice using a range of software packages appropriate to your field of study.

**Intermediate Mathematics**

Expand your knowledge of mathematical concepts including algebra, geometry, problem-solving, trigonometry and vectors.

**Introduction to Marketing Principles and Consumer Behaviour**

Learn about basic theories of marketing and consumer behaviour, using real-world examples and individual consumer experiences.

**Logic and Critical Thinking**

Explore the concepts, history and skills relating to logic and critical thinking, and how they apply in real-world contexts.

**Management Accounting and Financial Management**

Gain an understanding of key issues in management accounting, process costing, and profitability analysis.

**Mathematics**

Develop your mathematical skillset in areas such as algebra, decision maths, probabilities and statistics.

**Mathematics for Engineering**

Learn mathematical methods, symbolism and notation of engineering, as well as calculus differentiations, integration and differential equations.

**Mechanical Stress and Dynamics**

Develop an understanding of dynamics including stress and strain, shear force and bending, and Newton's laws of motion, momentum and force impulse.

**Organisational Behaviour**

Gain an understanding of management of work in organisations, and human resources and organisations in a global context.

**People, Culture and Society**

Learn about the history, theories and issues that relate to human culture and society around the world.

**Physics**

Gain an understanding of astrophysics, electromagnetism, mechanics and thermodynamics.

**Preparatory Mathematics**

Develop your numeracy skills, including algebra, geometry and graphs.

**Preparatory Science**

Gain an introduction to core scientific knowledge, and subject-specific language required to study the sciences.

**Preparatory Statistics**

Build on your knowledge of using statistics, including the use of data to illustrate facts and support theories.

**Programming**

Learn the basics of programming, engineering principles in the software industry, and how to use software systems to solve engineering problems.

**Quantitative Methods and Information Systems for Business**

Learn quantitative techniques used in industry, and analyse and interpret data and information systems in a business context.

**Reading and Writing 2**

Develop your English reading and writing so that you can understand and articulate ideas and reasoning.

**Reading and Writing 3**

Develop your English reading and writing skills to a sufficient level to communicate complex ideas.

**Research Design and Development**

Learn about the methods, tools, manufacturing techniques and materials used in engineering design, planning and implementation of a practical group project.

**Speaking and Listening 2**

Practise listening and speaking so that you are better prepared for academic debate and discussion.

**Speaking and Listening 3**

Improve your ability to listen and speak in English, allowing you to fully engage with academic topics.

**Statistics**

Learn basic algebra, as well as the skills needed to analyse and apply statistics in a range of ways.

**Study Skills Preparation**

Gain an introduction to the wide range of skills and strategies you'll need to succeed at university, such as research methods and using and citing sources.

**The Business Environment**

Engage in interactive projects that integrate practical, real-life situations with your knowledge of business theory.

**Thermofluids**

Understand fluid dynamics and thermodynamic principles, and analyse engineering problems in context.

**UK Society and Culture**

Learn more about the culture and society of the UK, and how it differs from others.

**Visual Culture**

Using an annotated visual research journal, evaluate key practitioners and movements and their historical, cultural and political contexts.
