

Leading to degrees at: University of Westminster | Queen Mary University of London

Minimum English level: UKVI IELTS score*	Course length	Course tuition	Course start > Course end	Add-ons	Extra support
> Your International Year One options for degree entry in September 2026					
5.5 overall with no less than 5.0 in any skill	2 terms	£18,290	September 2025 > May 2026	i	
			January 2026 > August 2026		
5.0 overall with no less than 4.5 in any skill	2.5 terms	£21,285	October 2025 > August 2026		0.5 terms of modules from Enhancement and Extended English and Skills options
4.5 overall with no less than 4.0 in any skill	3 terms	£21,285	September 2025 > August 2026		1 term of modules from Enhancement and Extended English and Skills options
> Your International Year One options for degree entry in September 2027					
5.0 overall with no less than 4.5 in any skill	2.5 terms	£21,285	July 2026 > May 2027	i	0.5 terms of modules from Enhancement and Extended English and Skills options
4.5 overall with no less than 4.0 in any skill	3 terms	£21,285	June 2026 > May 2027	i	1 term of modules from Enhancement and Extended English and Skills options
4.0 overall with no less than 4.0 in any skill	3.5 terms	£24,835	April 2026 > May 2027	i	1.5 terms of Extended English and Skills modules
			July 2026 > August 2027		
	4 terms	£28,360	February 2026 > May 2027 June 2026 > August 2027	i	2 terms of Extended English and Skills modules

\* UKVI IELTS alternatives: we can accept other tests as proof of English language. Learn more at: [kaplanpathways.com/uk/ielts/](https://www.kaplanpathways.com/uk/ielts/)

Academic entry requirements: for all course options, you need to have completed high school at the required level. For requirements specific to your country, select a degree and pathway course from our online Degree Finder: [kaplanpathways.com/kic/ug-degrees](https://www.kaplanpathways.com/kic/ug-degrees)

Course length: this is influenced by your English language score submitted at the admissions stage. When you enrol, we'll check your English and academic level again to ensure you're on the most suitable study plan, with modules that best fit your skills and goals.

All students will take the following modules:

- English for Academic Purposes
- Financial Accounting
- Introduction to Marketing Principles and Consumer Behaviour
- Management Accounting and Financial Management
- Organisational Behaviour
- Quantitative Methods and Information Systems for Business
- The Business Environment

**Personal development activities:** during your course, you'll also have activities to build practical, digital and employability skills.

**Learn more about modules:** you'll find module summaries later in this booklet.

**i Optional integrated online internship**

For selected course options and an extra fee (maximum £1,440), you can take an online internship as an additional final term while at the College in the UK. You will:

- apply and further develop your English language in a professional setting
- build real-world experience related to your degree subject at university
- gain additional career skills and experience and boost your CV before your degree.

See the undergraduate module summaries section for more details.

**Extra support:** for courses of over 2 terms, you will take additional modules from a selection of Enhancement and Extended English and Skills options (depending mainly on your IELTS score) before the modules to the left.

**Students with at least UKVI IELTS 5.5:** you can study a 2.5 or 3-term course that typically includes Enhancement modules to maximise your university preparation:

- Critical Reading, Writing and Reasoning for Higher Education
- Independent and Collaborative Study

**Plus up to 2 of these modules:**

- Digital Applications
- Preparatory Mathematics
- UK Society and Culture

**Students with less than UKVI IELTS 5.5:** you will typically study Extended English and Skills modules to improve your English language level and academic skills.

**Students with UKVI IELTS 4.5 or 5.0 will typically take:**

- English for Academic Study 3
- Independent and Collaborative Study
- Reading and Writing 3
- Speaking and Listening 3

**Students with UKVI IELTS 4.0 will typically take:**

- English for Academic Study 2 + English for Academic Study 3
- Independent and Collaborative Study
- Reading and Writing 2 + Reading and Writing 3
- Speaking and Listening 2 + Speaking and Listening 3
- Study Skills Preparation

**Biology**

Gain an understanding of biological systems and organisms, as well as key laboratory processes.

**Business Organisations and Management**

Examine key concepts in management theory and practice, and discuss issues relating to management in modern organisations.

**Chemistry**

Gain an understanding of chemical reactions, fundamental particles and the periodic table.

**Computer Architecture**

Discover the internal structure of microprocessor-based computer systems, and develop knowledge about the operation of low-level hardware and software components.

**Contemporary Global Issues**

Explore the big issues facing humanity in the 21st century, and critically evaluate their causes and effects.

**Creative Practice and Portfolio**

Research the work of selected practitioners in your field, responding to and evaluating their work, in your own illustrative portfolio.

**Critical Reading, Writing and Reasoning for Higher Education**

Enhance your ability to read and understand complex ideas in English, and to compose convincing written arguments.

**Digital Applications**

Develop your digital skillset, helping you use digital tools to support academic study, including using and citing digital sources.

**Economics**

Gain an understanding of macro and micro-economics, and explore current trends and issues in the field.

**Electrical and Electronic Engineering Principles 1**

Fundamentals principles of electrical and electromagnetic signals, and electronic components and circuit design.

**English for Academic Purposes**

Develop your English to the level you need for university study, and to really get involved in academic discussions.

**English for Academic Study 2**

Improve your English grammar and vocabulary in order to communicate in an academic environment.

**English for Academic Study 3**

Expand your knowledge of English grammar and vocabulary to the level required for degree study.

**Entrepreneurship**

Familiarise yourself with varied concepts of creativity, entrepreneurship and innovation, and how to apply them in business.

**Extended Project**

Learn how to plan, carry out and report an extended project; you can choose a project topic that matches your degree and career goals, and personal interests.

**Financial Accounting**

Learn about standard accounting conventions, and the role of financial accounting within organisation.

**Fundamentals of Artificial Intelligence**

Gain an understanding of the basic concepts, processes and uses of AI, as well as design and implement a variety of learning systems.

**Historical Perspectives**

Gain an understanding of the historical context of your chosen degree area, and skills such as researching, evaluating and interpreting sources.

**Independent and Collaborative Study**

Work individually and in teams on an academic task, and practise applying your subject knowledge and study skills.

**Information Technology**

Discover the key concepts of computer science, including data representation and programming languages.

**Intermediate Mathematics**

Expand your knowledge of mathematical concepts including algebra, geometry, problem-solving, trigonometry and vectors.

**Introduction to Databases**

Have the opportunity to construct conceptual data models, and to design and implement a data model for an information system.

**Introduction to Marketing Principles and Consumer Behaviour**

Learn about basic theories of marketing and consumer behaviour, using real-world examples and individual consumer experiences.

**Introduction to Programming**

Develop problem-solving and analytical skills, combined with an understanding of fundamental programming concepts, algorithms and data structures.

**Logic and Critical Thinking**

Explore the concepts, history and skills relating to logic and critical thinking, and how they apply in real-world contexts.

**Management Accounting and Financial Management**

Gain an understanding of key issues in management accounting, process costing, and profitability analysis.

**Mathematics**

Develop your mathematical skillset in areas such as algebra, decision maths, probabilities and statistics.

**Mathematics for Computing**

Develop an understanding of the fundamental aspects of mathematical concepts related to computing.

**Mathematics for Engineering**

Learn mathematical methods, symbolism and notation of engineering, as well as calculus differentiations, integration and differential equations.

**Mechanical Stress and Dynamics**

Develop an understanding of dynamics including stress and strain, shear force and bending, and Newton's laws of motion, momentum and force impulse.

**Object Oriented Programming**

Learn the fundamental principles of object-oriented programming using the C++ language.

**Organisational Behaviour**

Gain an understanding of management of work in organisations, and human resources and organisations in a global context.

**People, Culture and Society**

Learn about the history, theories and issues that relate to human culture and society around the world.

**Physics**

Gain an understanding of astrophysics, electromagnetism, mechanics and thermodynamics.

**Practical Skills for Art and Design**

Develop your practical Art and Design skills through workshops and portfolio development opportunities.

**Preparatory Mathematics**

Develop your numeracy skills, including algebra, geometry and graphs.

**Preparatory Science**

Gain an introduction to core scientific knowledge, and subject-specific language required to study the sciences.

**Preparatory Statistics**

Build on your knowledge of using statistics, including the use of data to illustrate facts and support theories.

**Programming**

Learn the basics of programming, engineering principles in the software industry, and how to use software systems to solve engineering problems.

**Quantitative Methods and Information Systems for Business**

Learn quantitative techniques used in industry, and analyse and interpret data and information systems in a business context.

**Reading and Writing 2**

Develop your English reading and writing so that you can understand and articulate ideas and reasoning.

**Reading and Writing 3**

Develop your English reading and writing skills to a sufficient level to communicate complex ideas.

**Research Design and Development**

Learn about the methods, tools, manufacturing techniques and materials used in engineering design, planning and implementation of a practical group project.

**Speaking and Listening 2**

Practise listening and speaking so that you are better prepared for academic debate and discussion.

Improve your ability to listen and speak in English, allowing you to fully engage with academic topics.

Learn basic algebra, as well as the skills needed to analyse and apply statistics in a range of ways.

Gain an introduction to the wide range of skills and strategies you'll need to succeed at university, such as research methods and using and citing sources.

Engage in interactive projects that integrate practical, real-life situations with your knowledge of business theory.

Understand fluid dynamics and thermodynamic principles, and analyse engineering problems in context.

Learn more about the culture and society of the UK, and how it differs from others.

Using an annotated visual research journal, evaluate key practitioners and movements and their historical, cultural and political contexts.

Create a high-quality website, incorporating developed web-based content using a web IDE and content management system.

While you're at the College in the UK, you'll take an online work placement as your final term if you choose a pathway course with integrated internship.

The internship is offered in partnership with Virtual Internships, a leading education company in the field. This gives you the chance to gain valuable work experience with one of 3,500+ companies around the world.

You will choose one of 18 career fields on your internship, based on your chosen progression degree. This will all help you develop important skills, practise your English and give you some great experience to add to your CV.

**Find out more:**  
*[kaplanpathways.com/internship](http://kaplanpathways.com/internship)*

We'll help you have a hugely beneficial cultural and social experience, and encourage you to explore different activities, sports, crafts and more. You might learn about local history and culture, or develop your wider subject knowledge and understanding of related industries.

Outside of your academic learning, you'll also be taught skills that will be useful at university and later in life. You'll receive help in making the most of your creativity, improving your communication and developing your digital skills. We'll also help you build a CV, portfolio and online profile to empower you after you graduate.

Forming a strong social network can be very beneficial, even if it's just to discuss and debate ideas. Not only will you get to know your classmates, you'll also have opportunities to join professional bodies, and network with students and industry professionals: something that can be really helpful when you go on to start your career.

## Notes
